ABOUT ME

Senior Backend Engineer with 10+ years of experience building scalable, enterprise-grade systems including ERP, warehouse management, and POS platforms. Specialized in Laravel, Golang, and Node.js, with a strong focus on system architecture, API design, and performance optimization.
Proven track record in handling high-volume data processing and developing reliable backend systems that support multi-branch operations. Delivered measurable impact by improving system performance, enhancing inventory accuracy, and increasing operational efficiency.
Experienced in system integration, database optimization, and Linux-based deployment. Worked collaboratively with cross-functional teams to deliver scalable, business-aligned solutions that enhanced team performance and project outcomes.

WORK EXPERIENCE

Senior Software Engineer
2024 – Present
Perum BULOG | Jakarta, Indonesia

- Designed, developed, and maintained backend systems for enterprise-scale operations aligned with internal company needs, e.g., Accounting and Tax System, Warehouse Management, etc.
- Designed and implemented REST APIs supporting 10k+ daily active users
- Improved API response time by optimizing database queries, reducing system processing time by 30%
- Collaborated with cross-functional teams to deliver 4 system features aligned with operational and business requirements, resulting in a 50% improvement in process efficiency or customer satisfaction.

Backend Software Engineer
2022 - 2024
Mamikos | Jakarta, Indonesia

- Developed backend services handling 50k+ daily requests using Laravel.
- Built RESTful APIs for web and mobile applications, enabling streamlined data exchange for 2 projects and improving development efficiency.
- Optimized API performance and database queries, reducing response time by 30% and improving data retrieval efficiency by 100 queries per second.
- Handled high-volume API requests for production system.

Research and Development Support
2017- 2022
PT. Liputan Enam Dot Com | Malang, East Java, Indonesia

- Supported R&D team in developing internal tools.
- Supported the development and testing of internal software solutions.

Fullstack Web Developer *2015- 2016*

CV. Zein Adikarya | Malang, East Java, Indonesia
